

Community update - December 2020

About the Randwick Campus Redevelopment

The NSW Government is partnering with UNSW Sydney to strengthen the Randwick Health & Innovation Precinct through the integration of additional health education, training and research with acute healthcare services - directly benefiting patients, carers and the NSW community.

Over \$1.5 billion is being invested in health, education and research, of which over \$1 billion is from the NSW Government. To deliver on the vision for the Precinct, three major projects are being delivered by the Randwick Campus Redevelopment, including:

- A new Prince of Wales Hospital Integrated Acute Services Building, due to open in 2022
- Sydney Children's Hospital Stage 1 and Australia's first Comprehensive Children's Cancer Centre due to open in 2025
- UNSW Sydney's Health Translation Hub, due to open in 2025

Construction of the new Prince of Wales Hospital is well underway and the new children's health services, together with UNSW's Health Translation Hub, are in planning and expected to be on Public Exhibition in the first half of 2021. We will continue to keep you informed as we progress through each exciting phase of the Redevelopment.

Thank you to all NSW Health Staff and Volunteers

The Randwick Campus Redevelopment team wishes to thank all staff and volunteers at the Randwick Hospitals Campus for their dedication, commitment and courage in supporting our community throughout the 2020 pandemic.

In recognition and acknowledgement, a 'thank you' sign has been installed on the main lift core of the new Prince of Wales Hospital Integrated Acute Services Building. It is our hope that all staff and volunteers can view this sign and feel truly proud of their unwavering efforts to keep us safe.

Construction activity on the site of the Randwick Campus Redevelopment

Prince of Wales Hospital Integrated Acute Services Building

With site remediation completed in late 2019, construction of the IASB began to take shape on the southern portion of the site between Randwick Hospital Campus and University NSW Sydney from early 2020.

The building is being constructed level by level, with plans to reach level 10 by the end of 2020, and topping out of the structure by early-February 2021.

Ongoing consultation with the community and clinical working groups has been helping to inform operational continuity of the existing hospital and prepare for the transition into the new building.

By mid-2021 works will commence to construct clinical and pedestrian link bridges from the IASB into the existing hospital campus and the UNSW translational space will be constructed on the eastern façade.

The Integrated Acute Services Building is on track to open in late 2022.

The Randwick Campus Redevelopment is transforming Hospital Road to open up a pedestrian plaza as part of delivering a healthy, green and connected precinct.

Hospital Road is being lowered to facilitate a service road below to maintain emergency access and campus logistics using Delivery Drive, and a pedestrian plaza constructed above, which will extend from High Street and connect the new developments with the existing Hospital campus.

The works continue to progress construction of the IASB, as well as preparing for the Sydney Children's Hospital Stage 1 and the Children's Comprehensive Cancer Centre and UNSW's Health Translation Hub, planned for the northern portion of the site.

Do you have any questions about construction?
Please feel welcome to call us any time on 1800 571 866 to speak with a member of our team.

Transforming Kids' Health - Sydney Children's Hospital Stage 1 and Australia's first Children's Comprehensive Cancer Centre

The Randwick Campus Redevelopment team is working with the Sydney Children's Hospitals Network, Children's Cancer Institute and UNSW Sydney to plan and design Sydney Children's Hospital Stage 1 and Australia's first Children's Comprehensive Cancer Centre. This project brings world-leading clinical care, research and teaching together to improve the way care is delivered to sick and injured children.

Bounded by Hospital Road, High Street and Botany Street, the redevelopment will connect with UNSW's Health Translation Hub to bring the Randwick Hospitals Campus and UNSW Kensington Campus closer together.

Where are we now?

Planning and design for the project are well underway. The Concept Design phase for the project commenced in early 2020. During this phase the project team proactively consulted with clinicians, academics, researchers, staff, patients, families and the community to define how the clinical services will function in the hospital and research facility and to determine the location of the departments in the building. The Schematic Design phase is near completion and the project team continues to consult with key stakeholders to test and determine the flows of departments and relationships of rooms.

Services being delivered in the new building include:

- A new children's emergency department and emergency short-stay unit, accessible from Botany Street with direct links to new and existing services
- A new children's intensive care unit
- New inpatient units for medical and surgical specialties
- A new medical short-stay unit
- A new pharmacy
- Back of house and logistics services
- New front of house and High Street drop off
- Australia's first Children's Comprehensive Cancer Centre that includes:
 - ◇ State-of-the-art technologically advanced wet and dry laboratory spaces
 - ◇ Education, training and research spaces
 - ◇ New oncology inpatient units, and patient and family focused retreat areas
 - ◇ A new day oncology unit.

Precinct vision comes to life with new strategy

With the launch of the Randwick Health & Innovation Precinct's three-year Strategy, the Precinct partners reflect on a big year.

2020 has undoubtedly been a time of great uncertainty but it is a year that has reinforced the importance of good health, the need to find answers to the world's biggest health dilemmas and to ensure our community feels safe. It has also been an opportunity for us to take a fresh look together at the way we conduct research, teach and collaborate in the provision of healthcare.

We have solidified our strategic direction by developing and launching our three-year Randwick Health & Innovation Precinct Strategy and identifying our points of difference, specifically our research and clinical care strengths. Behind the scenes, we have strengthened our Precinct governance structure and invested in the foundational steps to drive our innovation and industry agenda.

With the challenge of COVID-19, the Precinct partners collaborated on several pandemic response initiatives. These included developing a single QR code to streamline screening for staff, patients and visitors; completing over 36,000 COVID-19 screening tests in collaboration with NSW Pathology; as well as supplying thousands of reconditioned ventilators to health departments in urgent need.

The Randwick Health & Innovation Precinct looks forward to continuing our work to create positive health outcomes through collaboration and broad expertise.
