CAMPUS REDEVELOPMENT

Tower Crane Establishment - Extended site hours, Friday 13 and Saturday 14 December 2019

Two tower cranes will be used to construct the Prince of Wales Acute Services Building. The first Tower Crane was established on site in early November.

The second Tower Crane will be established on the construction site on Friday 13 December and Saturday 14 December 2019.

Extended working hours between 6am and 8pm have been approved and will apply on these dates for the safe and efficient establishment of the crane on site.

The crane will be delivered to the site in several pieces using large trucks. Deliveries will occur via construction access gates along Botany Street.

During this time the Construction Site Manager may be contacted on 1800 571 866.

Activities may be rescheduled due to unforeseen circumstances or inclement weather.

We thank you for your patience while we progress these important works.
