

## Sydney Children's Hospital Stage 1 and Children's Comprehensive Cancer Centre

### Improved Accessibility and Connectivity

Our aim is to create a safe, connected and pedestrian friendly campus that is easy to navigate with seamless connections to new and existing services across the Randwick Health & Innovation Precinct and improved accessibility to public transport options.

The Sydney Children's Hospital Stage 1 and Children's Comprehensive Cancer Centre (SCH Stage 1 and CCCC) will have multiple pedestrian access points including access from the main public entrance off High Street, through a green pedestrian plaza that connects with the UNSW Health Translation Hub, an entry to the south connecting to the Prince of Wales Integrated Acute Services Building and to the east connecting to the Sydney Children's Hospital, Randwick.

Equitable access to all entries and public domain spaces has been carefully considered due to the varying heights across the site. Ramps have been incorporated into the public domain design to ensure equitable access is achieved from High Street.

Here's how the SCH Stage 1 and CCCC is improving accessibility and enhancing transport options.

#### Public Drop Off

The existing Sydney Children's Hospital, Randwick High Street drop off zone will be maintained and extended to include the short-stay drop off area for the SCH Stage 1 and CCCC.

#### Emergency Drop Off and Parking

Botany Street will provide the main vehicular entrance to the emergency department drop off and emergency short stay parking.

#### Visitor Parking

Non-emergency visitor parking will continue to operate from the main Randwick Hospitals Campus carpark located off Barker Street.

#### Ambulance Access

The lowered Hospital Road will provide ambulances access to the emergency department and ambulance bays located beneath the building.

#### Sustainable Transport Options

The redevelopment is supported by sustainable transport options, including the South East Sydney Light Rail and local bus networks providing connections to Greater Sydney.

#### End of Trip Facilities

New Randwick Health & Innovation Precinct end of trip facilities, including lockers, change rooms and showers, are set to support the shift to more sustainable transport options.

#### Link Bridges

Link bridges will physically connect the SCH Stage 1 and CCCC with the Prince of Wales Integrated Acute Services Building, the UNSW Health Translation Hub and the existing Sydney Children's Hospital, Randwick.

#### Hospital Road Lowering

Hospital Road is being lowered to facilitate a service road below to maintain emergency access and campus logistics using Delivery Drive with a pedestrian plaza constructed above, extending from High Street and connecting the Randwick Campus Redevelopment with the existing Hospital campus.
