

Construction activities continue on-site for the Prince of Wales Hospital Integrated Acute Services Building; the first stage of the Randwick Campus Redevelopment and the catalyst project for expanding the world-class health, research and education facilities at the Randwick Health & Innovation Precinct.

Key construction activities continuing during February include:

- Integrated Acute Services Building (IASB) concrete pouring, structural works and façade installation
- Stage 3 Hospital Road works including piling and road pavement construction along Hospital Road (north)
- Minor works will continue along Hospital Road (south) to reinstate road pavements and footpaths
- Access to Delivery Drive via Hospital Road (south) from Barker Street
- Construction of bulk oxygen storage facility on Francis Martin Drive and associated single lane closures
- Service utility investigations, relocations and upgrades
- Works internal to the Hospital Campus car park at level B4
- Out of hours equipment deliveries

An existing median strip on Barker Street, at the Hospital Road intersection, will be modified to enable right traffic turn into Hospital Road. For traffic and safety reasons this work will occur out of hours.

Construction hours

The majority of activities are scheduled during approved construction hours - Monday to Friday 6am - 10pm and Saturday 7am - 5pm. To support works along Hospital Road, deliveries of large equipment will occur out of hours. It is a requirement of Transport for NSW that equipment movements of this size occur out of hours.

Other work may be planned outside of the approved construction hours to ensure the safety of workers, pedestrians and motorists, and to minimise impacts to local traffic and hospital access. Activities are dependent on weather and site conditions and subject to change. Out of hours work will be notified in advance accordingly.

Minimising construction impacts

We are committed to minimising the impact of our works where we can. All construction activities are carried out with the health and safety of the local community as our top priority. We endeavour to keep noise, dust and vibration to a minimum.

Thank you for your patience while we work to deliver the new hospital.
