

Notification of weekend works – tower crane installations, commencing Saturday 1 April 2023

To support ongoing construction of the new Sydney Children's Hospital Stage 1 and Minderoo Children's Comprehensive Cancer Centre, weekend site activity is planned during April to install two tower cranes.

Works will be undertaken between 6am and 7pm daily and are scheduled for Saturday 1 and Sunday 2 April to install the first tower crane, followed by Saturday 29 and Sunday 30 April for the second tower crane, weather permitting.

The tower cranes will arrive in separate pieces and be installed using a mobile crane.

Construction vehicles and equipment will enter the site premises via the Botany Street construction gate and carry out all activities from within the construction site.

Some noise is likely as a result of these works.

For any questions or concerns about this work, please contact the project team via the details below.

Thank you for your patience while we work to deliver this exciting project.
