

## **Notification of out of hours deliveries and weekend activity – Saturday 23 March 2024**

To support ongoing construction of the new Sydney Children's Hospital Stage 1 and Minderoo Children's Comprehensive Cancer Centre, approved activities are scheduled for Saturday 23 March to deliver, unload and partially construct link bridge components for the new building.

To enable the safe delivery of oversized structural components, trucks and trailers will access the construction site from the Botany Street site entrance between midnight and 5am.

Unloading of materials will commence from 8am in line with standard construction hours, with construction activity continuing throughout the day and concluding no later than 5pm.

These works may result in minor noise impacts from vehicles entering and exiting the site, along with the unloading and assembly of structural components.

For any questions or concerns about this work, please contact the project team.

Thank you for your ongoing patience while we deliver this exciting project.

*Activity dates and times are subject to change. A contingency date of Saturday 6 April 2024 has been identified in the event of inclement weather.*
